Porta-Jib Spider Dolly and Flex-Trak

Bob picked up a cool new "Toy" at NAB this year!

The Spider Dolly is the most portable professional dolly on the market. Combined with a piece of Flex-Trak, the simple 3-Leg Spider converts your tripod into an extremely portable, tracking dolly.

Combined with the amazing Flex-Trak, the seamless dolly track can be configured in straight runs that can suddenly curve in any radius or direction. The basic unit is 40', which will loop to make on 17' run. With two pieces the dolly will create a 40' run. Each section rolls up into a 2' diameter bundle and weighs 40lbs creating unprecedented portability for a track rigid enough to support an operator, yet flexible enough to curve into a 90 degree turn with a 2' radius. The key to FlexTrak's success lies

in the unique capability of our Spider Dolly's track wheels, which are designed with double articulating arms that create the ability to negotiate sharp radius turns.
